Research Methods in Politics DSE-11	4	3	1	-	NA	NA

Learning Objectives

The course would serve as the first formal introduction to the basics of social science research in the specific context of the discipline of Political Science. As an elementary course to introduce the students to the fundamentals of research in the study of politics, the purpose of the course is twofold - first, to familiarise students with the different methodologies to study the discipline of politics; second, to walk them through the application of these methods through selected texts. By the time

this course is offered, the students would be familiar with the salient analytical frameworks and arguments in the discipline. This course offers the students the opportunity to understand the methods by which these frameworks were arrived, the tools that were used to make them comprehensible, and the debates that the arguments spawned. The course is divided into three parts. The first will introduce the student to some key debates. The second takes them through the praxis of research by asking elementary questions such as, how to conceptualize a research problem, how to formulate research questions, etc. The third aims to introduce them to specific methodologies by using the strategy of reading a well-known work to discern the method used accompanied by an article that reflects upon that method.

Learning outcomes

On successful completion of the course, students would demonstrate:

- Preliminary training in basic elements of social science research
- Familiarity with how to conceptualize a research problem
- Familiarity with diverse methodologies used in the study of politics
- Skills to identify and understand the use of specific methodologies in a text
